

Xiaomi Exclusive Store powered by Abans opens at OGF

Marks initiative with 177 launch

XIAOMI Sri Lanka, marked a significant day in the brand's local journey with the launch of the all-new Xiaomi 17T and the grand opening of the new Xiaomi Store powered by Abans at One Galle Face Mall, Lower Ground last week.

This occasion reflects the brand's growing presence in the country and its commitment to bringing smarter technology, connected devices and immersive customer experiences closer to Sri Lankan consumers.

Held under the theme "Step into a smarter world with Xiaomi", the launch event welcomed media, partners, technology enthusiasts and customers to experience Xiaomi's latest innovation and wider smart ecosystem. The new store at One Galle Face Mall powered by Abans has been designed to give customers a hands-on experience across Xiaomi smart phones, smart home products, lifestyle technology and connected devices, supported by Abans' strong presence and customer service network.

The Xiaomi 17T, introduced to the Sri Lankan market on this day, is designed for users who want advanced imaging, powerful performance and reliable all-day use in one premium device. Positioned as "The Telephoto Master", the Xiaomi 17T features a Leica professional triple camera system, including a 50MP Leica main camera, 50MP Leica 5x periscope telephoto camera, and 12MP ultra-wide camera. With up to 128 AI Ultra Zoom, Leica Live Moment and Leica Summilux optical lens technology, the device enables users to capture portraits, landscapes,

travel moments and everyday stories with greater clarity and creativity. The Xiaomi 17T is powered by the MediaTek Dimensity 8800 Ultra processor, delivering smooth performance for multitasking, gaming, entertainment and content creation. The device also features a 6.8-inch 1.05 120Hz eye-care display, offering an immersive visual experience with enhanced comfort for everyday viewing. Its 6500mAh silicon-carbon battery and 67W HyperCharge support ensuring dependable power for users with fast-moving lifestyles.

Xiaomi Sri Lanka Country Head, Kain Wang said: "17th June is a significant day for Xiaomi in Sri Lanka as we celebrate two important milestones together: the launch of the new Xiaomi 17T and the opening of our new Xiaomi Store powered by Abans at One Galle Face Mall. This reflects the strength of Xiaomi's journey in Sri Lanka and our continued commitment to offering innovation, performance and smarter lifestyle experiences to local consumers. With Xiaomi 17T, we are bringing advanced Leica imaging, powerful performance and long-lasting battery life to users who want to do more with their smartphones. At the same time, our new store creates a dedicated space for customers to experience the Xiaomi ecosystem in a more personal and engaging way."

Abans Chief Marketing Officer, Dr. Chathura Jayawardena said: "Abans is proud to strengthen its partnership with Xiaomi and bring the brand's latest innovations to Sri Lankan consumers. Beyond smartphones, Xiaomi's ecosystem includes a wide range of smart home appliances, personal care devices, health technology, and lifestyle solutions that are transforming the way people live and interact with technology. The opening of this new Xiaomi Exclusive Store reinforces our full commitment to making innovative connected technologies more accessible to customers across Sri Lanka. Backed by Abans' extensive retail footprint and after-sales service network, we are confident in delivering a seamless ownership experience while supporting the growing demand for smarter living solutions."

Sumathi IT becomes Sri Lanka's only HPE Gold Networking Partner

SUMATHI Information Technologies Ltd. (SIT), the technology arm and a subsidiary of Sumathi Holdings, has been named Sri Lanka's only Gold Partner for networking by Hewlett Packard Enterprise (HPE) for 2026, as enterprises face increasing pressure to modernise networks while maintaining uptime, security and cost discipline. The recognition reinforces SIT's position as a leading enterprise IT system integrator in Sri Lanka, supporting organisations navigating complex infrastructure decisions in a constrained operating environment.

This comes as reliable and secure network infrastructure is increasingly critical to business continuity across sectors, including banking, telecommunications, and government. HPE's Gold Partner status is awarded based on stringent criteria,

including certified engineering capability, delivery standards, and commercial performance, offering enterprises greater assurance in vendor selection and execution. For organisations where downtime, security exposure, and integration complexity carry direct financial implications, the presence of a locally established Gold tier partner provides practical advantages. These include stronger access to global expertise, more structured implementation, and closer alignment between technology deployment and business outcomes.

The partnership is further strengthened by the breadth of HPE's networking portfolio, spanning Aruba, HP Networking, and Juniper Networks. This enables SIT to support enterprises in designing integrated network architectures across campus, data centre, and high-performance

environments, addressing the growing need for scalable and future-ready infrastructure.

Commenting on the milestone, Sumathi IT Chief Technology Officer, S. Sivasankar said: "This recognition reflects the depth of capability we have built over time and our continued focus on delivering consistent outcomes for our customers. As organisations place greater emphasis on reliability and long-term value, our role is to support them with solutions that are both robust and adaptable."

With over two decades of experience and a client base spanning more than 500 organisations across banking, government, and telecommunications, SIT continues to support Sri Lanka's entry price sector in strengthening its digital backbone, combining global partnerships with local expertise.

Senior representatives of Gestetner of Ceylon PLC and MAXHUB at MAXHUB Connect 2026

Gestetner of Ceylon and MAXHUB unite to bring world-class collaborative technology to Sri Lanka

GESTETNER of Ceylon PLC (GOC) has formally announced its appointment as the Authorised Distribution Partner for MAXHUB in Sri Lanka, a move widely regarded as a landmark development in the country's smart workspace technology landscape.

MAXHUB, a globally recognised leader in collaborative display technology and intelligent workplace solutions, has built a formidable reputation across enterprise, education, and institutional sectors worldwide. With this partnership now formalised, the full MAXHUB portfolio is positioned to redefine how Sri Lankan organisations collaborate, present, and innovate, supported by the assurance of local technical expertise and after-sales infrastructure that only GOC can provide.

"This partnership directly addresses a long-standing gap in the Sri Lankan market access to premium, globally certified collaborative technology, backed by genuine local support," said Gestetner Director A.R. Rasiah.

The announcement signals a significant and deliberate expansion of MAXHUB's authorised presence in South Asia, with Sri Lanka now poised to benefit from cutting-edge collaboration tools that have already transformed workplaces and educational institutions across the globe.

The official product launch, MAXHUB Connect 2026, was held recently at the Monarch Imperial, Battaramulla. The event drew industry professionals, corporate executives, educational sector leaders, media representatives, and channel partners from across Sri Lanka, all gathered to witness the formal introduction of MAXHUB's innovative product lineup to the local market.

Guests witnessed live demonstrations of MAXHUB's full capabilities through interactive flat-panel displays breathing new life into boardrooms, to wireless collaboration systems eliminating the friction of hybrid work.

The event was not simply a product launch; it was a declaration of intent, marking the beginning of a new era in collaborative workplace technology for Sri Lanka.

Singer unveils first HONOR Experience Store at One Galle Face

SINGER Sri Lanka PLC has marked a significant milestone in its partnership with global technology brand HONOR with the opening of the first HONOR Experience Store in Sri Lanka, located at the One Galle Face (OGF) Mall.

The launch reflects both brands' long-term commitment to the Sri Lankan market and highlights HONOR's strong expansion in the country. Since commencing operations in Sri Lanka in April 2023 through its exclusive partnership with Singer Sri Lanka, HONOR has witnessed exceptional growth, rapidly building customer trust and brand affinity. In just three years, the brand has achieved a meteoric rise to become the number

Singer Sri Lanka and HONOR representatives officially open the first HONOR Experience Store at One Galle Face

one smartphone brand in Sri Lanka, a testament to its innovation, quality, and customer-centric approach.

To celebrate this success and signal its future ambitions, the HONOR Experience Store was officially opened at Level 04 of One Galle Face Mall. The launch event was attended by key management from Singer Sri Lanka and HONOR,

along with a large gathering of consumers. The newly opened store has been designed to deliver an immersive and interactive retail experience, offering visitors a comprehensive journey into HONOR's ecosystem. From flagship smartphones and AI-powered innovations to smart accessories and connected lifestyle products, the space enables visitors to

explore and engage with cutting-edge technology in a global standard retail environment. Singer Group Managing Director Mahesh Wijewardene said: "The launch of the first HONOR Experience Store at One Galle Face Mall is a proud milestone for us and reflects our long-term vision for the brand in Sri Lanka. In a short span of time, HONOR has earned the trust of Sri Lankan consumers and established itself as a market leader and trend setter. This store is a testament to our commitment to delivering world-class retail experiences while making the latest innovations more accessible to our customers."

HONOR Sri Lanka Country Manager Zeng Lexing said: "Sri Lanka has become an important market for HONOR, and our strong partnership with Singer has played a pivotal role in our rapid growth. Achieving the number one position is a significant accomplishment, and the opening of this flagship experience store reflects our confidence in the market and our commitment to long-term investment. We look forward to bringing even more advanced technologies to Sri Lankan consumers."

The HONOR Flagship Store is powered by Singer Sri Lanka PLC, HONOR's trusted partner in the country through its flagship retail concept. With its premium design and experiential layout, the store sets a new benchmark for smartphone retail in Sri Lanka.

ShelterZoom's global partnerships put people at the heart of AI agenda

ShelterZoom Co-founder and CEO Chao Cheng-Shorland (centre) with CIO Co-founders Kirby de Lanerolle (left) and Fiona de Lanerolle (right)

As a critical enterprise priority in the AI and cyber era. That vision extends beyond technology alone. As artificial intelligence reshapes organisations, questions of trust, resilience and governance increasingly involve both systems and people. ShelterZoom's inclusion of partners spanning digital infrastructure, critical systems and human potential reflects a growing recognition that the future of organisational resilience will require both trusted technology and empowered people.

Developed by Kirby and Fiona de Lanerolle, with the AI innovation team at WOV Media Productions, CIO emerged from years of exploration across neuroscience, positive

psychology, ethics, theology and human development. Drawing on studies of resilience post-traumatic growth and leadership across diverse cultural and organisational contexts, the framework seeks to better understand why some individuals and organisations flourish under pressure while others remain constrained by unseen assumptions, limiting beliefs and inherited narratives.

"Artificial intelligence may amplify capability, but conscience determines how that capability is expressed. The organisations that thrive in the AI era will be those that understand not only what their people can do, but what they can become," Conscience IQ founder Kirby de Lanerolle said.

At its core is a simple conviction: human potential cannot be fully understood through a single lens. Effective leadership, resilience and performance require an appreciation of the diverse experiences, knowledge systems and contexts that shape human decision-making.

Conscience IQ seeks to reveal what conventional metrics often miss: the unseen factors that shape human potential. By helping organisations identify hidden constraints and untapped strengths, it offers a new lens through which to understand growth, adaptability and transformation.

AS boardrooms across Asia double down on AI investment, cybersecurity upgrades and digital transformation, a quieter but equally urgent question is gaining traction among forward-thinking leaders: Are we developing our people with the same ambition we apply to our platforms?

Miami-based cybersecurity innovator ShelterZoom, recognised by Gartner for three consecutive years, is betting the answer matters enormously. Through a new wave of strategic partnerships that include SIB CSDS, a core SoftBank Group technology company, UK-based critical infrastructure specialists The Kerton Group, and human potential intelligence platform Conscience IQ (CIO), the company is advancing a compelling argument: organisational resilience in the AI age demands both trusted technology and empowered people.

ShelterZoom has built a global reputation for trusted digital infrastructure, cybersecurity and business continuity solutions, with collaborations extending to organisations such as the United Nations International Computing Centre (UNICC), the Pontifical Oriental Institute at the Vatican, leading healthcare institutions and enterprise partners.

ShelterZoom co-founder and CEO Chao Cheng-Shorland noted that organisations increasingly recognise "data lineage and
